Image Filter

The Image Filter Module is licensed on a per-seat basis. You must specify the total number of seats (computers) that will connect to the CensorNet proxy and use the Image Filter. For example, if you have 200 machines specify 200 seats. If you have 200 machines but only purchase a 100 seat license, the first 100 machines to connect to CensorNet will have the Image Filter enabled and the remaining ones will not.
